MEMORANDUM FOR: Acting Deputy Director for Administration

VIA: Director of Logistics

STATINTL

FROM:
Chief, Real Estate and Construction
Division, OL

SUBJECT: Proposed DIA/CIA Collocation

- REFERENCES:
- (a) MFR dtd 9 Nov 78 fm DCI, Subject: Conversation with Deputy Secretary of Defense Duncan, 8 November 78 (paragraph 6)
 - (b) Memo dtd 23 May 78 to DDA fm DC/RECD/OL, Subject: Breakdown of Components for Proposed DIA Building
 - (c) Memo dtd 31 May 78 to A-DDA fm DC/RECD/OL, Subject: same as (b) above

1. By Reference (a), the DCI requested clarification of the DIA personnel figures associated with construction at Bolling Air Force Base or Langley and more detail on just what clearances are required and from whom in order to do any building at Langley. His query on personnel figures is answered in this memorandum and his question on clearances will be answered by separate memorandum by close of business Monday, 20 November 1978.

2. Regarding personnel figures, projected DIA manning after the proposed consolidation at Bolling Air Force Base is summarized in Attachment 1. These figures, plus current manning figures, broken down by functional element, are all shown in more detail in the manning matrix included as Attachment 2 which is current as of 15 November 1978. We have also included as Attachment 3, DIA organization charts which can be used in conjunction with Attachment 2 if more detail on each organizational element is desired.

OL 8 5235

SUBJECT: Proposed DIA/CIA Collocation

3. We have circled on Attachment 2 those elements which we previously identified to you in References (b) and (c) as being analytical elements which would be suitable for location at Langley. If you recall, we originally estimated that these elements would contain 1,559 personnel. Subsequently, the DCI suggested that we reduce reproduction, library, and administration manning levels by 10 percent; delete Defense Attache System (DAS) headquarters support personnel; and add back in scientific intelligence and estimates. Having done so, our new total was 1,630 personnel. If we do the same thing with the figures shown on Attachment 2, we get a new total of 1,800 personnel rather than 1,630. This difference exists because DIA changed their projected manning levels subsequent to the referents and because we originally assumed that headquarters management of the DAS was included in the figure for basic intelligence production when, in fact, it was not.

4. In addition to this new, 1,800 man personnel figure, discussions between the DIA and CIA focal point officers on 16 November lead us to believe that there are several other elements which should be located at Langley. These elements include approximately half of the 75 contractor personnel and at least some of the collection managers and security specialists shown in Attachment 2. The contractor personnel provide maintenance and software support to the data processing systems which would be located at Langley and some collection and security personnel are involved in direct support of analysts. In any event, the number of additional personnel involved should not exceed the 2,000 man figure approved by the National Capital Planning Commission (NCPC) as part of the Agency's preliminary Master Plan. In summary, we have evolved to a point where virtually all elements to be included at Bolling Air Force Base would instead be located at Langley (within the 2,000 man figure) with the exception of some management and security personnel, the photo processing lab now located in the Cafritz Building, and the Defense Intelligence School and its students located in Anacostia.

DIA Projected Manning in 1983
(after consolidation at
Bolling AFB)

| <u>Location</u> | <u>Number of Personnel</u> |
|--|----------------------------|
| New Building at Bolling | 2739* |
| Defense Attache System (overseas) | 880** |
| Other US (DIA reps at other USG agencies and UN) | 90 |
| Pentagon | 795 |
| NPIC | <u>262</u> |
| | 4766 |
| Subtracting personnel <u>not</u> paid directly by DIA (see * below) | - <u>418</u> |
| | 4348 |

*Includes 418 personnel not paid directly by DIA consisting of 75 contractor personnel providing primarily ADP support, 300 students, and 43 liaison personnel from other agencies and allies.

**Includes US and foreign nationals paid directly by DIA.

DIA ORGANIZATION CHARTS
AND KEY PERSONNEL

DISTRIBUTION C&G

PREFACE

The DIA Organization Charts and Key Personnel document is published:

- To provide uniform and approved information for external requests and presentations.
- To provide within the Agency a handy tool for ease of reference to DIA organizational structures and key personnel.

These charts will be updated and published quarterly by RS. Please report updated information to RCC-3, extension 79902.
